

# World Fuel Services Corporation Reports Fourth Quarter and Full Year 2021 Results

February 24, 2022

MIAMI--(BUSINESS WIRE)--Feb. 24, 2022-- World Fuel Services Corporation (NYSE: INT)

## **Fourth-Quarter 2021 Highlights**

- Total gross profit of \$215.2 million, up 30% year-over-year
- GAAP net income of \$15.4 million, or \$0.25 per diluted share
- Adjusted net income of \$17.6 million, or \$0.28 per diluted share
- Adjusted EBITDA of \$56.2 million

## **Full Year 2021 Highlights**

- Total gross profit of \$788.2 million, down 7% year-over-year
- GAAP net income of \$73.7 million, or \$1.16 per diluted share
- Adjusted net income of \$86.0 million, or \$1.36 per diluted share
- Adjusted EBITDA of \$241.3 million

“We delivered solid results in what remained a challenging operating environment in 2021, and we believe we are well-positioned to carry that momentum into 2022,” stated Michael J. Kasbar, chairman and chief executive officer. “With a broad global customer base in land, sea and air markets worldwide, we are uniquely positioned to support our customers with their ongoing energy requirements as well as an expanding suite of innovative and custom-tailored sustainability solutions.”

For the full year, our aviation segment generated gross profit of \$386.9 million, an increase of 10% year-over-year, principally related to increased volumes driven by the continued recovery in demand for passenger air travel, partially offset by a reduction in our government-related activity in Afghanistan, which concluded in the third quarter. Our marine segment generated gross profit of \$100.3 million, a decrease of 34% year-over-year, principally related to a decline in average margins in the core resale business when compared to the strong margins achieved in the prior year related to the supply imbalances arising from the implementation of the IMO 2020 regulations. Our land segment generated gross profit of \$301.1 million, a decrease of 13% year-over-year, principally related to the sale of the MultiService payment solutions business in 2020.

“We generated \$173 million of operating cash flow in 2021 and despite a significant increase in fuel prices, we returned nearly \$80 million to shareholders through stock buybacks and our dividend during the year,” said Ira M. Birns, executive vice president and chief financial officer. “With the Flyers Energy acquisition complete, we begin 2022 poised for growth with a more ratable and leverageable business model when compared to prior years.”

## **Non-GAAP Financial Measures**

This press release contains non-GAAP financial measures (collectively, the “Non-GAAP Measures”), including adjusted net income attributable to World Fuel Services, adjusted diluted earnings per common share, and adjusted earnings before interest, taxes, depreciation and amortization (“EBITDA”). The Non-GAAP Measures exclude acquisition and divestiture related expenses, restructuring costs, impairments, gains or losses on the extinguishment of debt and gains or losses on business dispositions primarily because we do not believe they are reflective of our core operating results.

We believe that the Non-GAAP Measures, when considered in conjunction with our financial information prepared in accordance with GAAP, are useful to investors to further aid in evaluating the ongoing financial performance of the Company and to provide greater transparency as supplemental information to our GAAP results.

Non-GAAP financial measures should not be considered in isolation from, or as a substitute for, financial information prepared in accordance with GAAP. In addition, our presentation of the Non-GAAP Measures may not be comparable to the presentation of such metrics by other companies. Adjusted diluted earnings per common share is computed by dividing adjusted net income attributable to World Fuel Services and available to common shareholders by the sum of the weighted average number of shares of common stock, stock units, restricted stock entitled to dividends not subject to forfeiture and vested restricted stock units outstanding during the period and the number of additional shares of common stock that would have been outstanding if our outstanding potentially dilutive securities had been issued. Investors are encouraged to review the reconciliation of these Non-GAAP Measures to their most directly comparable GAAP financial measures in this press release and on our website.

## **Information Relating to Forward-Looking Statements**

This release includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including statements regarding our beliefs and expectations about our performance in 2022, our ability to capitalize on our sustainability solutions and our unique position to meet our customers' energy requirements, as well as our view of our business model after the Flyers Energy acquisition. These forward-looking statements are qualified in their entirety by cautionary statements and risk factor disclosures contained in the Company's Securities and Exchange Commission ("SEC") filings, including the Company's most recent Annual Report on Form 10-K filed with the SEC. Actual results may differ materially from any forward-looking statements due to risks and uncertainties, including, but not limited to: our ability to successfully implement our growth strategy and integrate acquired businesses and recognize the anticipated benefits, our ability to capitalize on new market opportunities, potential liabilities, limited indemnities and the extent of any insurance coverage, our ability to effectively manage the effects of the COVID-19 pandemic, the extent of the impact of the pandemic on ours and our customers' sales, profitability, operations and supply chains due to actions taken by governments and businesses to contain the virus, customer and counterparty creditworthiness and our ability to collect accounts receivable and settle derivative contracts, sudden changes in the market price of fuel or extremely high or low fuel prices that continue for an extended period of time, the availability of cash and sufficient liquidity to fund our working capital and strategic investment needs, any global economic impacts or other significant volatility that may arise from geopolitical events, wars and other civil unrest, adverse conditions in the markets or industries in which we or our customers and suppliers operate, such as the current global economic environment as a result of the coronavirus pandemic, our ability to manage the changes in supply and other market dynamics in the regions where we operate, our failure to comply with restrictions and covenants in our senior revolving credit facility and our senior term loans, including our financial covenants, our ability to successfully execute and achieve efficiencies, our ability to achieve the expected level of benefit from any restructuring activities and cost reduction initiatives, inflationary pressures and its impact on our customers or the global economy, unanticipated tax liabilities or adverse results of tax audits, assessments, or disputes, our ability to capitalize on new market opportunities, risks related to the complexity of the U.S. and foreign tax legislation and any subsequently issued regulations and our ability to accurately predict the impact on our effective tax rate and future earnings, our ability to effectively leverage technology and operating systems and realize the anticipated benefits, potential liabilities and the extent of any insurance coverage, actions that may be taken under the current administration in the U.S. that increase costs or otherwise negatively impact ours or our customers and suppliers businesses, the outcome of pending litigation and other proceedings, the impact of quarterly fluctuations in results, particularly as a result of seasonality, supply disruptions, border closures and other logistical difficulties that can arise when sourcing and delivering fuel in areas that are actively engaged in war or other military conflicts, our failure to effectively hedge certain financial risks associated with the use of derivatives, uninsured losses, the impact of climate change and natural disasters, adverse results in legal disputes, and other risks detailed from time to time in our SEC filings. In addition, other current or potential risks and uncertainties related to the coronavirus pandemic include, but are not limited to: notices from customers, suppliers and other third parties asserting force majeure or other bases for their non-performance, losses on hedging transactions with customers arising from the volatility in fuel prices, heightened risk of cybersecurity issues as digital technologies may become more vulnerable and experience a higher rate of cyber-attacks in a remote connectivity environment, reduction of our global workforce to adjust to market conditions, including increased costs associated with severance payments, retention issues, and an inability to hire employees when market conditions improve, the impact of asset impairments, including any impairment of the carrying value of our goodwill in our aviation and land segments, as well as other accounting charges if expected future demand for our products and services materially decreases, a structural shift in the global economy and its demand for fuel and related products and services as a result of changes in the way people work, travel and interact, or in connection with a global recession. New risks emerge from time to time and it is not possible for management to predict all such risk factors or to assess the impact of such risks on our business. Accordingly, we undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, changes in expectations, future events, or otherwise, except as required by law.

#### About World Fuel Services Corporation

Headquartered in Miami, Florida, World Fuel Services is a global energy management company involved in providing energy procurement advisory services, supply fulfillment and transaction and payment management solutions to commercial and industrial customers, principally in the aviation, marine and land transportation industries. World Fuel Services also offers natural gas and electricity, as well as energy advisory services, including programs for carbon offsets, sustainability solutions and renewable energy alternatives. World Fuel Services sells fuel and delivers services to its clients at more than 8,000 locations in more than 200 countries and territories worldwide.
